WHAT IS WONDER FINISH?

Wonder finish is Tanfoglio's heat treating process for steel. It is not a plating, so it will not separate from the base metal. This heat treating process increases the surface hardness, thus decreasing wear, and increasing abrasion resistance. The Wonder finish process creates a self lubricating, corrosion resistant barrier between the surface of the pistol and the underlying metal that is over 12 microns deep. It maintains the superior characteristics of iron carbon steel for rigidity and durability with the look and corrosion resistance of stainless steel.

GENERAL DISCLAIMER

All Photographs, descriptions and information contained in this catalog are purely indicative. European American Armory Corp., its manufactures and suppliers reserve the right to modify and/or change any and all products either for improvements or for manufacturing and/or commercial reasons. All weights and dimensions are averages and may change due to manufacturing tolerances, material changes, commercial reasons and improvements.

WHERE TO PURCHASE EUROPEAN AMERICAN ARMORY PRODUCTS

Most products shown in this catalog are supplied to local firearms retailers by wholesale distributors. European American Armory also sells directly to local retailers. If your local retailer does not have an item of your choice in stock, it can be ordered from their distributor, or directly from EAA. Note: Due to frequent state and local federal regulation changes some products may no longer be available in your area. For assistance in locating specific products or parts, call (321) 639-4842 extension 10. You may also contact EAA Corp. by fax at (321) 639-7006, or email us at eaacorp@eaacorp.com. European American Armory accepts Visa & Mastercard for parts sales only.
